

Checklist for cleaning the washing machine

Instructions

- ☒ Before starting the programme, check if the drum can turn freely and isn't blocked by any item
- ☒ Fill up the washing and rinsing agent compartments
- ☒ Choose the right programme and start
- ☒ After the programme has finished and you have removed the clothes, take a piece of dry cloth and dry the door rubber seal to avoid smell and mold build up
- ☒ Leave the door a bit open so the washing drum can dry. If something is in the way and the door cannot be left open, then dry it with a soft dry cloth
- ☒ Clean the soap and bleach compartments every 2nd week
- ☒ Clean the rubber seal once a week
- ☒ Check and clean the bottom water pump filter once a month
